There is no way I can determine that. Warrants are kept confidential and they have no duty to tell me anything. Anyway, you have to come back and deal with whatever may be here and of course you have my full attention. I'll see you Monday morning, but feel free to contact me if anything actually happens between now and then. My cellphone is 203-676-1401. Please do not use it unless there is a true emergency.

I asked her 3 weeks ago if any cops had come by and she said no.

thanks so much for getting back to me.
see you Monday.
no negotiating.
I am fucking tired of this shit and will fight to the bitter end.

yes it is a vindictive woman trying to hurt me.
finally got out of her it was not a cop just some guy coming by and asked if I was there.
American women John. It is really evil there. I been in 5 countries and just nothing like America.
You probably read how some cunt came out of the woodwork and accused Kavanagh about something from High School... lear
They re deploying these tactics. It is real. The stuff I have learned being on a full diet of listening to all types of dissident political and out of the mainstream political people and their experiences. FBI showing up at houses, getting doxxed, false accusations, etc... this is no joke. The women in USA are crazy and will do anything and say anything especially when pressed on lying. This Tennant of mine has a crush on me ... I gave her my place as a friend so she could save money and she sends me this crazy email on the eve of me returning. I asked her about this and now she writes "I assumed" it was police. Get me the hell out of there.
